INTELLIGENCE PATHWAYS

The Intelligence Pathway is a mentally and emotionally demanding pathway program. We ask each participant to study crimes, school shootings, and acts of violence in order to understand these situations and develop ways to prevent them. Candidates will create an original intelligence product that addresses an area of interest to them in the Intelligence fields of physical security, human intelligence, or signals intelligence. Candidates will need to conduct research, develop a methodology, and present their intelligence product in an Intelligence Showcase. This pathway is not for the faint of heart and requires an additional psych eval and support during the program, but also has the potential to be not only rewarding but also a step forward for both Drift Net Securities and the candidate.
